Jody:

NMED is in receipt of the electronic data enclosed with your letter dated June 29, 2001. We appreciate your prompt attention to our request (NMED's e-mail dated May 29, 2001). However, bullet one of NMED's e-mail has not yet been addressed:

- During NMED's review of the WIPP's Groundwater Level Data for April 2001 (dated April 26, 2001), it was noticed that the water level measurement summary page for the month of April for all existing wells was missing (typically found as page 3 or 4 in the reports).

Please note that the water level database included in your June 29 letter does not include measurements for year 2001; is there any way that NMED can get a separate electronic file covering measurement data from January through May, 2001, and then get monthly updates from then on?

Thanking you in advance,

Will Fetner
