For the official record, I am against increasing the waste classification system at WIPP. First of all, this was NOT included in the original mission statement of the project at Carlsbad. It was for waste storage only, not classification of waste received AFTER it reached WIPP. Second, I believe this would increase transit shipments, even inappropriate ones, on our not-too-adequate hiway system to Carlsbad. Third, there is a strong possibility that INappropriate waste would arrive, thus causing more transportation/storage problems on a continuous basis. Let's keep it simple: Let's don't do this. Kathryn Warren, POB 114, Velarde, NM 87582-0114 (resident for 24 years)
