Jody:

This e-mail is to remind you of our telephone conversation on September 17 regarding the on-going groundwater sampling event at WIPP (DMP Round #13, September - November). As you know, NMED is interested in observing some of the sampling activities (purging and /or sampling) of this event. On September 17 you said that a detailed schedule of sampling activities would be mailed to us. Since NMED representatives are going to be in Carlsbad on October 9th for the public meeting, can you please send me (fax or e-mail) the schedule in question at your earliest convenience?

Thanks. Will.
