Jody -

As we discussed on the phone last week, I am concerned that CBFO has not clarified the demands that will be placed on NMED to obtain and maintain security clearance. I raise this concern because Steve Holmes is having to take General Employee Training (16 hours) from WIPP as a condition of obtaining clearance. This was not clear before we submitted our packets for national security positions.

Please identify in writing all conditions that NMED staff must satisfy, both initially and in the future, in order maintain a security clearance. You might also want to describe these conditions to the public at the upcoming RSI workshops when you explain the "Recordkeeping and Audit Requirements for Classified Information" modification. Remember, I believe NMED is doing CBFO a favor by being willing to undergo the process of obtaining a security clearance... I just want to be sure we all understand the long-term commitment on behalf of NMED in order for CBFO to propose their permit modification request and have it approved.

Steve
