*Waste Isolation Pilot Plant
Notification of Class 1 Permit Modification*

The U.S. Department of Energy-Carlsbad Field Office and Westinghouse TRU Solutions LLC are notifying you of a Class 1 Permit Modification to the Waste Isolation Pilot Plant Hazardous Waste Facility Permit, Permit Number: NM4890139088-TSDF.

A Class 1 permit modification notice was submitted to the New Mexico Environment Department on May 30, 2002. The following is a summary of each change made with the notification.

Correct Typographical Error in the Contingency Plan

This permit modification will remove double negative in the Contingency Plan to clarify that TRU mixed waste containers, containing off-site waste, will not be opened at the WIPP facility.

Update the Emergency Notifications Information

This permit modification updates telephone numbers and addresses for emergency notifications in the Contingency Plan.

Update Emergency Equipment

This permit modification will update the descriptions of the plant base radio and the monitor/defibrillator in the Contingency Plan. The modification will also update the Contingency Plan to reflect new locations for emergency equipment.

Incorporate Organizational Changes

This permit modification incorporates organizational changes affecting the Contingency Plan.

Clarifies Fuel Station Information

This permit modification removes the "#2" designation found in the Contingency Plan for the underground fuel station because there is only one underground fuel station.

Updates list of Permits

This permit modification updates the list of active environmental permits/approvals found in Attachment O of the Permit, the Part A Application.
