Subject: Class 2 PCB Permit Modification Request - Requested Disk

Steve, first, I would like to apologize for the inconvenience this has caused NMED. This was not our intention.

We have discussed the matter here regarding the availability of electronic media for your use and believe that if you can have access to the FTP (we can provide a password to you to access), the information needed will be readily available and will assist in preventing this problem in the future.

In the interim, we are sending you an e-mail with the appropriate package attached and also a disk by Fed Ex, the latter should arrive tomorrow morning.
