Comments on Proposed Class 2 Modification
(Revise PCB Prohibition)
To the Hazardous Waste Facility Permit
For the U.S. Department of Energy's Waste Isolation Pilot Plant

To Steve Zappe of the
state of New Mexico Environment Department
07/23/2003, Wednesday

Regarding DOE's class 2
Modification concerning WIPP
that was submitted on
May 21, 2003, Wednesday, I do
not have a strong opinion
one way or the other on
revising the PCB Prohibition.
I do emphasize that nuclear
waste with PCB's in it be
stored safely with strict
laws and regulation, though
since the United States Senate,
United States House of Representatives and the
United States president currently
seem to be quite corrupt

due to big money contributions to their campaigns due to big donors, and because the United States system of government seems to be a plutocracy and the voices of the poor generally seem to be left out as a result, I do not trust the United States Senate and the United States House of Representatives and the United States President, regardless if they are Democrats or Republicans, not to change laws and/or regulations to allow Nuclear Waste that has PCB's in it to be stored quite unsafely if that is what the big donors to their campaigns want. as a result, I want ~~public financing of~~

all of the United States
Senators, United States House of
and United States President
that are paid for by United States
taxpayer money that can be
accepted by the people running
for public office on the federal
level in the United States
on a voluntary basis, and I
recommend full disclosure
of all campaign contributions
to all federal candidates to be
done immediately after receiving
the campaign contributions to
the candidates for federal office,
by having them put on the internet.

Campaigns

Representatives

Thank You.
