ENTERED

To Steve Zappe of the State  
of New Mexico Environment Department,

I agree with and I support  
the State of New Mexico Environment  
Department's Permit Modification Request  
that the only waste that should go to  
to WIPP near Carlsbad, New Mexico  
is the waste that was on the original  
inventory when the original permit  
was issued, ~~first~~ to be on the  
safe side. For example, I believe  
that remote controlled waste and  
sludge are too dangerous to be  
shipped and stored at WIPP.

Take care,  
Mañana Day
