Subject: WIPP Changes

Attn: Steve Zappe:

It has come to my attention that DOE repeatedly asks to add waste materials to WIPP without the original restrictions associated with opening WIPP. What are they trying to do to New Mexico's fragile environment?

Is there any way that you can put a stop to those requests and make sure that the DOE accepts the permit as it was intended to assure the citizens of at least a modicum of safety? Do what you can, please.

Patricia Manion
Santa Fe, New Mexico
