memorandum

Carlsbad Field Office
Carlsbad, New Mexico 88221

DATE: March 9, 2004

REPLY TO
ATTN OF: CBFO:NTP:KWW:VW:04-1061:UFC:5822

SUBJECT: Authority Granted to INEEL AMWTP for Characterization and Certification of Contact Handled Homogenous Solids Transuranic Waste

TO: Elizabeth Sellers, DOE-ID Manager

The Carlsbad Field Office (CBFO) completed the initial certification audit of the Idaho National Engineering and Environmental Laboratory (INEEL) Advanced Mixed Waste Treatment Project's (AMWTP) transuranic (TRU) waste program. Audit A-03-05 was conducted at the AMWTP August 18-22, 2003 to evaluate the technical and quality assurance programs for compliance with the "Waste Analysis Plan" (WAP) of the WIPP *Hazardous Waste Facility Permit*, the *Quality Assurance Program Document*, the *Contact-Handled Transuranic Waste Acceptance Criteria for the Waste Isolation Pilot Plant*, and other CBFO requirements and standards. The audit team returned to AMWTP on October 15-16, 2003 to verify implementation of corrective actions and reconciliation of the acceptable knowledge record and determined that the following processes were satisfactory and effectively implemented.

S3000 Homogeneous Solids

Acceptable knowledge
Data validation and verification
Gas generation testing
Headspace gas sampling (HSG) and analysis
Nondestructive assay (55 & 85 gallon drums)
Solids sampling
Real-time Radiography (RTR)
Visual Examination (quality control check on RTR)
WIPP Waste Information System (WWIS) interface

Based on the results of Audit A-03-05, the CBFO is granting authority for characterization, certification and transportation of homogeneous solids waste (S3000). For the first and second stage sludge TRU waste stream, this authority is limited as follows:

1. Preliminary solids sampling and analysis data collected by INEEL during the 3100 m³ project may be used for containers identified to be within lot one.
2. Solids sampling and analysis must be conducted to confirm acceptable knowledge for subsequent lots.
3. Prior approval must be obtained from CBFO if AMWTP wishes to apply preliminary solids sampling and analysis data to later lots.

040312

Elizabeth Sellers

-2-

March 9, 2004

CBFO approval for lots subject to limitation 3 listed above is contingent upon successful discussion between CBFO and the New Mexico Environment Department as specified in their limited approval letter dated December 23, 2003.

Attachment 4 of this certification letter identifies AMWTP lot one first and second stage sludge containers that can be input into the WWIS using preliminary solids sampling and analysis data.

Use of preliminary solids sampling and analysis data for characterization of additional waste streams must be evaluated and approved by CBFO on a case-by-case basis. This approval must be requested early enough to allow for thorough review by CBFO. Containers from lots to which preliminary solids sampling and analysis data has been applied shall not be shipped prior to receipt of written approval from CBFO.

Transportation authority was previously granted on March 27, 2003. The attachments to this letter contain the complete lists of certified procedures, documents, and systems. AMWTP may not ship debris waste to the WIPP until all characterization activities have been fully audited and approved. TRU waste certification, characterization, or transportation using significantly revised or new processes, procedures, or systems must be evaluated by the CBFO prior to their implementation.

R. Paul Detwiler
Acting Manager

AMWTP CERTIFICATION PROGRAM STATUS

The CBFO Office of the National TRU Program Manager and Quality Assurance Manager have evaluated the documentation supporting the results of Audit A-03-05 and recommends to the CBFO Manager that authority for certification and characterization of contact handled homogenous solids be granted to the Advanced Mixed Waste Treatment Project for the following processes:

S3000 - Homogeneous Solids

Acceptable knowledge
Data validation and verification
Gas generation testing (2 mobile gas analysis systems)
Headspace gas sampling and analysis (3 NFT drum vent systems)
Nondestructive assay (2 Canberra Integrated Waste Assay Systems – 55 & 85 gallon drums)
Solids sampling
Real-time radiography (2 systems)
Visual examination as a quality control check on RTR
WIPP Waste Information System

It is recommended also that this authority be limited to S3000 homogeneous solids waste. The AMWTP may not ship debris waste until all characterization activities have been fully audited and approved.

Transportation authority was previously granted on March 27, 2003 (memorandum CBFO:NTP:DCG:VW:03-1620:UFC:5822) and will be re-evaluated during A-04-12 scheduled for April 12-16, 2004.

Attachments 2 and 3 are the lists of systems and procedures that constitute the bounds of the AMWTP characterization and certification authority.

STATUS

- All program elements are complete.
- The following required site documents that demonstrate how the AMWTP complies with the CBFO requirements are current and effectively implemented.
 - ❑ QAPjP – MP-TRUW-8.2, Revision 2, *Quality Assurance Project Plan*
 - ❑ GGTP QAPjP – MP-TRUW-8.4, Revision 0, *QAPjP for Gas Generation Testing Plan*
 - ❑ WCP - MP-TRUW-8.1, Revision 4, *Certification Plan for INEEL Contact-Handled Transuranic Waste*
 - ❑ QAP – Section 4.0 of MP-TRUW-8.1.
 - ❑ TRAMPAC and QA Plan – MP- TRUW-8.3, Revision 2, *TRUPACT-II Authorized Methods for Payload Control*
 - ❑ Packaging QA Plan – Section 8 of MP-TRUW-8.3.
 - ❑ Standard operating procedures (see attachment 3 for a complete procedure list)

- AMWTP participation in the following performance demonstration programs (PDPs):
 - **HSG PDP** – Participation was satisfactory in Cycle 17A for three GC/MS Systems (A – ID#0478107242, B – ID#0477907240, and C – ID#0478007241) . (Memo CBFO:NTP:MRB:VW:03-2635 dated July 29, 2003).
 - **NDA PDP Drums** -- Participation was approved for two Canberra Integrated Waste Assay Systems (DAS-102 and DAS-103) in Cycle 10A (Memo CBFO:NTP:MRB:IW:04-0261:UFC:5822 dated January 29, 2004).
 - **RCRA Drums** – Participation was satisfactory (ALD INEEL) in Cycle 10A for the analysis of metals and aqueous extractable VOCs (Memo CBFO:NTP:MRB:IW:03-2153:UFC:5822 dated May 20, 2003)
- CBFO completed Audit A-03-05 on August 22, 2003 and issued the interim audit report on September 18, 2003. The audit team returned to the AMWTP on October 15, 2003 and verified corrective action completion before issuing the Final Audit Report to NMED on November 12, 2003. A revised Final Audit Report was issued to NMED on December 12, 2003. The audit team determined that the AMWTP TRU waste program is in compliance with the CBFO requirements and the processes evaluated were implemented effectively.
- NMED approved Final Audit Report A-03-05 for homogeneous solids on December 23, 2003, but limited the approval for use of preliminary solids sampling and analysis data to only those waste containers remaining from the first lot of the original 3100 m³ project.
- EPA issued a QA inspection report on November 13, 2003 based on an inspection conducted August 19-21, 2003 that contained outstanding quality assurance issues. EPA returned for a followup inspection on October 15-16, 2003 to close out those issues and issued approval on March 9, 2004. EPA issued the technical inspection report on January 30, 2004. CBFO responded to three findings and one concern on February 19, 2003. EPA issued the final approval for the AMWTP on March 8, 2004.
- There were six CARs issued during Audit A-03-05. CARs 03-072 through 03-77 were successfully closed on October 28, 2003. Also, NDA CAR 04-006 was issued to AMWTP on October 27, 2003 and successfully closed on November 6, 2003. No CARs remain open at the AMWTP.

RECOMMENDATION

The recommendation to the CBFO Manager is to grant the INEEL AMWTP authority for characterization, certification, and shipment of contact-handled transuranic S3000 homogenous solids using those processes audited and approved during Audit A-03-05 with the exceptions noted above and in the cover letter.
