**Subject:** WIPP Shipment being returned to INEEL

Mike Brown just called to say that a shipment from INEEL headed for WIPP is being turned around in Colorado and being sent back to INEEL. WIPP is not sure that the waste meets all the required WIPP criteria. Mike did not know any more on what further communication will be made with us about this shipment other than Gary Trujillo's inspection team is being notified directly of the change. I told Mike that CBFO should be prepared to answer questions about the shipment at the quarterly meeting on Tuesday of next week. Mike also said he thought that corrective actions were being discussed with NMED.
