**~NOTICE~**

**Waste Isolation Pilot Plant  
Notification of Class 1 Permit Modifications**

The U.S. Department of Energy (DOE) Carlsbad Field Office and Washington TRU Solutions LLC hereby notify you of the following Class 1 Permit Modifications to the Waste Isolation Pilot Plant (WIPP) Hazardous Waste Facility Permit (HWFP); Permit Number: NM4890139088-TSDF.

The following Class 1 permit modification notices were submitted to the New Mexico Environment Department (NMED) on the date indicated below. Included with the notice is a summary of the change requested.

**September 30, 2004 (Class 1)**

This modification allows for the construction of a covered area for any contact-handled transportation package (TRUPACT-II or HalfPACT) as well as other equipment in the parking area unit. Currently, these items are stored in the same location, however without any cover. The cover is designed to prevent direct sunlight on these items, thus reducing the external surface temperature.

**November 10, 2004 (Class 1)**

This modification changes the name of the DOE Carlsbad Field Office acting manager from R. Paul Detwiler to Lloyd L. Piper.

**November 24, 2004 (Class 1)**

Remove the brand name of the push-pull forklift attachment used in the repository. This will remove the brand name "Loron" that currently describes the push-pull device in the permit.

Update WIPP Web page address. The WIPP Web page address has been changed and this modification replaces the old address with the new address. The new address is <http://www.wipp.ws>.
