**Subject:** NO! on USDOE permit request

Dear Mr. Zappe:

I have received notice on the US DoE's request for a revised, consolidated permit modification request to you on 2/29/05 and am in favor of denying any action that would allow WIPP's ability to function. WIPP is an extremely dangerous and volatile disposal facility and the transport of such waste from 13 states makes our nation's roadways less secure. Despite public opposition, WIPP was opened and allowed to operate as is, regardless of environmental degradation for thousands of years and the hazards to public roadways described above. As a member of an administration whose Chief Administrator (you-know-who) was instrumental in WIPP's inception, I realize my request is somewhat an act of pure optimism, but hope you will do the right thing on behalf of NM residents and for future generations of all living things.

A-ho Metakwe Oasin,  
Scott Thomas  
Taos, NM
