

May, 2005 -

Dear Mr. Zappe:

I lived and worked in McKinley County, New Mexico from 1986 through 1998, and saw the damage to the land around Ambrose Lake, and the disastrous affects the uranium exposure created on the Wamp people who lived and worked in the Anacanda Mines, as well as other mines in the area.

Please protect your people from further harm and dangerous exposure to these lethal wastes.

Thanks.

Angela Bianca R.N., S.C.
