Subject: Advance Notice of Corrective Action Report 08-021 Due Date for Revised Corrective Action Completion

Dear Mr. Haar:

Corrective Action Report (CAR) 08-021 was identified during Audit A-08-16 of the Los Alamos National Laboratory Central Characterization Project, and is classified as an accelerated action CAR. The revised corrective actions are to be complete and supporting documentation is to be submitted to the Carlsbad Field Office (CBFO) by July 10, 2008.

This is advance notification for completion of actions regarding this CAR. The original required completion due date for this CAR was May 24, 2008. The original due date was extended to June 24, 2008, based on an extension request submitted in site correspondence on May 6, 2008, and approved by CBFO on May 7, 2008. The current timeframe is based on the closure documentation submitted in site correspondence on June 25, 2008, and evaluated by CBFO on June 30, 2008.

Please review the progress of actions regarding this CAR and determine if the current timeframe is realistic for completion and submittal. No action is necessary if the date is adequate for completion of actions. However, if additional time is needed, please submit an extension request and relevant justification for the request.

If you have questions, please contact me at (575) 234-7491.

Sincerely,

Dennis S. Miehls
Senior Quality Assurance Specialist

Mr. David H. Haar
