**RE: NMED EVALUATION OF ACCEPTABLE KNOWLEDGE SUFFICIENCY DETERMINATION
REQUEST, SR-BCLDP.004.003
WASTE ISOLATION PILOT PLANT
EPA I.D. NUMBER NM4890139088**

Dear Dr. Moody and Mr. Sharif:

On June 18, 2009, the New Mexico Environment Department (NMED) received a request for evaluation of a provisionally approved Scenario 3 Acceptable Knowledge (AK) Sufficiency Determination Request (**Determination Request**) for Battelle Columbus Laboratory (BCL) waste stream SR-BCLDP.004.003 at the Savannah River Site (SRS), from the Department of Energy's Carlsbad Field Office (CBFO). CBFO and Washington TRU Solutions LLC (WTS) (collectively, **the Permittees**) submitted this request for evaluation under the Waste Isolation Pilot Plant (WIPP) Hazardous Waste Facility Permit as specified in Permit Attachment B, Section B-0b. A Scenario 3 Determination Request seeks to demonstrate that chemical sampling and analysis is not required because the AK information is sufficient. The information submitted by the Permittees consisted of the following items:

- A transmittal letter requesting NMED's evaluation of the Permittees' provisional approval of the Determination Request
- An "Acceptable Knowledge Sufficiency Determination Request" from WTS for Waste Stream SR-BCLDP.004.003, Battelle Columbus Laboratories RH TRU Tri-Nuc Vacuum Filter Debris Waste From the Building JN-1 Hot Cell Laboratory Transfer and Storage Pool; Waste Stream SR-BCLDP.004.003

100924

- CBFO Management Procedures for Determination Request reviews and general document reviews; a list of Determination Request reviewers and qualifications; Determination Request checklists (completeness, technical adequacy); and a Document Review Record for the Determination Request
- “Acceptable Knowledge Sufficiency Compliance Matrix for Waste Stream SR-BCLDP.004.003,” a table documenting the contents of the Determination Request and the Permittees’ review of the Determination Request
- Supporting documents provided electronically on a DVD, which included approximately 407 AK source documents

NMED issued a Notice of Deficiency (NOD) on the Determination Request to the Permittees on October 20, 2009. The NOD informed the Permittees of NMED’s finding that the Determination Request did not meet the requirements for a Determination Request as specified in the Permit, and provided both an evaluation of the adequacy of the Permittees’ review and provisional approval of the Determination Request (Attachment 1 of the NOD) and an evaluation of adequacy of the information submitted by the generator/storage site to the Permittees (Attachment 2 of the NOD). Among other things, NMED noted that WTS had submitted the Determination Request and that there was no indication, either on the Determination Request cc list or the CBFO Request for Evaluation cc list, that the generator/storage site (i.e., SRS) had been involved in any substantive manner in the submittal of the Determination Request for this waste stream. Additionally, the Permittees had not submitted AK Summary Report CCP-AK-SRS-540 for Waste Stream SR-BCLDP.004.003, as required by Permit Attachment B4, Section B4-3d, and therefore NMED was unable to complete its review of the Determination Request.

On April 1, 2010, NMED received a response to the NOD in a transmittal dated March 30, 2010, which included the Permittees’ responses to NMED’s evaluation of their review and provisional approval. The letter also transmitted a response letter from SRS, a revised matrix with their detailed response to each of NMED’s comments in Attachment 2 of the NOD, and several documents, including AK Summary Report CCP-AK-SRS-540, supporting their response to NMED comments.

Based on a review of all the information provided in the Permittees’ and SRS/CCP’s response to the NOD, NMED finds the Determination Request, consisting of the AK Summary and NOD response, to be adequate. NMED therefore concurs with the Permittees’ provisional approval of the Determination Request. This concurrence is limited to the two liners identified as waste stream SR-BCLDP.004.003 in the May 7, 2008 spreadsheet titled, “BCLDP RH TRU Waste Inventory Analysis” in AK source document U513 (attached).

Dr. Moody and Mr. Sharif
