Mr. James Bearzi, Chief
 Hazardous Waste Bureau
 New Mexico Environment Department
 2905 Rodeo Park Drive East, Building 1
 Santa Fe, New Mexico 87505-6303

Subject: Transmittal of the Waste Isolation Pilot Plant Groundwater Level Measurements for February 2011

Dear Mr. Bearzi:

The purpose of this letter is to submit the Waste Isolation Pilot Plant groundwater level measurements for February 2011, as required by Part 5, Section 5.10.2.2. of the Hazardous Waste Facility Permit No. NM4890139088-TSDF.

We certify under penalty of law that this document and all enclosures were prepared under our direction or supervision according to a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on our inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of our knowledge and belief, true, accurate, and complete. We are aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

Please feel free to contact Daniel J. Ferguson at (575) 234-7018 if you have any questions regarding this data transmittal.

Sincerely,

Edward Ziemianski, Acting Manager
 Carlsbad Field Office

M. F. Sharif, General Manager
 Washington TRU Solutions LLC

SUMMARY COMMENTS FOR THE WATER LEVEL MEASUREMENTS FOR THE
MONTH OF FEBRUARY 2011

1. The WIPP Hazardous Waste Facility Permit (Permit), Attachment L, Section L-4c (1) requires reporting of cumulative fluctuations noted in the Detection Monitoring Program (DMP) wells of more than two feet in the course of one year which are not attributable to site tests and subsequent stabilization. The Calendar Year 2009 Annual Site Environmental Report (ASER), was submitted to the New Mexico Environment Department in compliance with the Permit, and summarizes and discusses DMP water level changes greater than two feet for calendar year 2009. Changes in DMP well water levels greater than two feet for the current year, if any, are reported in the data sheet and will be discussed in the ASER for calendar year 2011.
2. Calculations used to derive water level and fresh water head elevations in Table 1:
 - $\text{Adjusted Depth to Water(ft)} = \text{Depth to Water from Measuring Point(ft)} - \text{Adjustment(ft)}$
 - $\text{Water Level(ft amsl)} = \text{Top of Surveyed Casing Elevation(ft amsl)} - \text{Adjusted Depth to Water(ft)}$
 - $\text{Column Height(ft)} = \text{Water Level(ft amsl)} - \text{Culebra Midpoint Elevation(ft amsl)}$
 - $\text{Fresh-water Head(ft amsl)} = \text{Specific Gravity} \times \text{Column Height(ft)} + \text{Culebra Midpoint Elevation(ft amsl)}$
3. For production-injection packers (PIPs) installed on tubing or Water Quality Sampling Program wells with tubing access ports, an adjustment is necessary to reference the water level to the surveyed fixed permanent casing [Top of Casing(TOC)]. If the measuring point is above the TOC, the depth to water relative to TOC is less. If the measuring point is below the TOC, the depth to water relative to TOC is greater (ref: WP 02-EM1014, Rev 5).
4. Groundwater level measurements were not taken at wells H-02b1, H-09bR, H-09c and H-04c due to Sandia National Laboratories testing and instrumentation activities. Water level measurements at H-04c and H-02b1 are anticipated to resume in April 2011. Water level measurements at H-09bR and H-09c are anticipated to resume in May 2011.

Groundwater level Measurements for February 2011

Notes

1. Recovering from development 09/2005 and bailing 01/2007.
2. Water level elevation rise due to local oil drilling activity; declining back to equilibrium.
3. Recovering from pumping 04/2007.
4. Water level depressed from SNL testing ending on March 2010; recovering.
