 **ENTERED**

JUN 22 2011

JUN 2011

Mr. John Kieling, Acting Chief
 Hazardous Waste Bureau
 New Mexico Environment Department
 2905 E. Rodeo Park Drive Building 1
 Santa Fe, New Mexico 87505-6303

Subject: Annual Proposed Acceptable Knowledge Sufficiency Determination List

Dear Mr. Kieling:

Pursuant to Permit Condition Attachment C, Section C-0b, Acceptable Knowledge Sufficiency Determination (AKSD), the Permittees are required to submit to the New Mexico Environment Department a list of waste streams which the Permittees may submit for an AKSD during the upcoming federal fiscal year. The Permittees are proposing one waste stream for the upcoming federal fiscal year:

- SR-RL-BCLDP.001: A Remote Handled transuranic debris waste stream

This remote-handled transuranic debris waste stream consists of organic and inorganic debris generated during repackaging of the waste materials generated from research and development activities conducted in Building JN-1 at the Battelle Columbus Laboratories Decommissioning Project. This waste stream is similar to other waste streams previously receiving an AKSD.

We certify under penalty of law that this document and all enclosures were prepared under our direction or supervision according to a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on our inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of our knowledge and belief, true, accurate and complete. We are aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

Please feel free to contact George T. Basabilvazo at (575) 234-7488 if you have any questions regarding the proposed determination list.

Sincerely,

Edward Ziemianski, Acting Manager
 Carlsbad Field Office
