Dear Mr. Hall,

I am very concerned that shielded containers at WIPP allow more remote-handled waste that is dangerous to transport, store, and dispose.

I request at public hearing on shielded containers, which should be a class 3 modification to allow additional public comment and hearing.

Thank you for your consideration.

Sincerely,

Andrew Gold ; Santa Fe,NM

Santa Fe, NM 87505

Dear Mr. Hall:

I am very concerned about shielded containers. They would expand the space available at WIPP for remote-handled waste that is dangerous to transport, store, and dispose. Despite what the Department of Energy says, shielded containers could not be handled like contact-handled waste because damaged or leaking containers could not be overpacked.

The shielded containers request is not a proper class 2 permit modification. I request a public hearing and that shielded containers be a class 3 modification so that there would be more extensive public comment and an opportunity for a hearing.

Sincerely,
Marilyn Hoff

Subject: Re: RH waste at WIPP & use of shielded lead containers to ship and dispose

Mr. Hall and Mr. Kieling,

We are very concerned about shielded containers. They would expand the space available at WIPP for remote-handled waste that is dangerous to transport, store, and dispose. Despite what the Department of Energy says, shielded containers could not be handled like contact-handled waste because damaged or leaking containers could not be overpacked.

The shielded containers request is not a proper class 2 permit modification. We request a public hearing, and that shielded containers be a class 3 modification so that there would be more extensive public comment and an opportunity for a hearing. We have attended greater- than Class C waste hearings as well as CMRR- NF hearings for LANL and find they are vital for public information and the protection of citizens' rights.

Respectfully,
Bonnie Korman and Robert Bishop

Subject: WIPP waste

Dear Mr Hall:

I hear that you are considering allowing shielded containers of "hot" remote-handled waste at WIPP. As tempting as i'm sure it must be to throw this anti-life scourge in a repository that is currently open and on a route currently traveled by other such poison, I do not want it crossing my path in this fair city of Albuquerque. At the very least i would like to see a public hearing on shielded containers, a class 3 modification. Though i'm sure it's beyond the scope of your official job description, i would like the NM Environment Dept to outlaw production in this state of materials for which we have no constructive use and which endanger the health of current and future generations. Please add that to your mandate!

Thanks for your time & care for these matters.

Donna Detweiler
