Subject: FW: WIPP Annual Site Environmental Report (ASER)

Pam,
Please include this in the December WIPP file.

Subject: WIPP Annual Site Environmental Report (ASER)

Hi Janet,

The following web address will take you to the Environmental Monitoring page of the WIPP website.

http://www.wipp.energy.gov/Documents_Environmental.htm

Here you will find all environmental reports that WIPP puts out. The 2002 through 2010 ASERs can also be found here.

The following website will take you to the 2010 WIPP Annual Site Environmental Report (ASER)

http://www.wipp.energy.gov/library/ser/11-2225_ASER.pdf

Table F. 9 – Water Levels, can be found starting on page 261 of the report.

Magenta well data can be found starting on page 276 of the report.

If you wanted to find these documents simply go to the WIPP Home page:

<http://www.wipp.energy.gov/index.htm>

Then click the Documents tab at the top, click on Documents, Environmental Monitoring is the very first link. Click it and it will take you to the ASERs

where well data can be found for all the wells at WIPP that cover all the water-bearing zones of the Culebra, Magenta, Dewey Lake, and Bell Canyon.

The ASER will continue to be available to the public either in hard copy by request or on the WIPP website. Information on requesting a hard copy of the ASER can be found on page 5 of the ASER.

Thanks Janet and we look forward to our discussion on the Groundwater PMR.

Ricardo Maestas
