Subject: FW: Current Class 2 PMR - Ventilation Language

Good morning,

As you know, the Department has expressed concerns that the request to remove the ventilation requirement in an active RH room when workers are emplacing waste does not fall within the Class 2 PMR. This was discussed with Mark Turnbough last Friday afternoon and subsequently he requested that this portion of the ventilation PRM be removed and that the remaining portions be granted. I will be drafting the revised language today. Please confirm that this is agreeable.

Trais Kliphuis
