Good Morning Trais,

Thank you for the quick response! I will forward this to George. Have a great day!

Good Morning Anthony,

We discussed the AKSD waste stream situation that you described yesterday and are recommending that you submit a letter explaining that the waste stream does not exist yet. This will release you from any requirement to have a public meeting. When you anticipate the start up, include it in the July 1 notification that precedes the start up.

As always, please let me know if you have further questions or concerns.
