Dear Trais Kliphuis,

I am very concerned about shielded containers. The shielded containers request once again is not a proper class 2 permit modification. I request a public hearing and that shielded containers be a class 3 modification. Then there would be more extensive public comment and an opportunity for a hearing.

Despite what the Department of Energy says, shielded ^{containers} could not be handled like contact handled waste. There would be a danger that damaged or leaking containers could be too radioactive to over-pack.

I implore you to hold a public hearing and give the public an opportunity to present their concerns.

It's important that the workers be protected from contamination and that the environment and the air and water also be protected from contamination.

Very Sincerely, Floy Barrett

Dear Trais Kliphuis,

I am very concerned about shielded containers. The shielded containers request once again is not a proper class 2 permit modification. I request a public hearing and that shielded containers be a class 3 modification. Then there would be more extensive public comment and an opportunity for a hearing.

Despite what the Department of Energy says, shielded ^{with them} could not be handled like contact handled waste. There would be a danger that damaged or leaking containers could be too radioactive to over-pack.

I implore you to hold a public hearing and give the public an opportunity to present their concerns.

It's important that the workers be protected from contamination and that the environment and the air and water also be protected from contamination.

Very Sincerely, Floy Barrett
