Hello Rick,

I have no questions on the last map package that you submitted.

I did have a few comments on the Semi-Annual Report that I presented my group with. The text below is what I sent to the group on June 21st.

.....
.....

After reviewing the May 24, 2012 Transmittal of the WIPP Semi-Annual Groundwater Surface Elevation Report (NMED received May 25,2012)
Here are my comments:

1. I believe the report would benefit from having a Table of Contents to point out the page numbers for:
 - a. Introduction
 - b. Discussions
 - c. Well hydrographs and data

d. References

- 2. Does Figure 1 need a scale?
- 3. Well H-07b1, page 14: is "water well on same pad" the same as "approximately 100 feet away" page 3, 4th paragraph
- 4. Page 17: There is no hydrograph or place holder for well H-11b4R even though it is listed in Table -1 on page 1

We can discuss this next week. I'm thinking we can let the Permittees know that we would like some of these in their next report.

Thanks!

.....

.....

We have not had a chance to discuss these at length yet but please feel free to look at my comments and tell me what you think. As stated in the last sentence above, we would most likely just request that some of these be included in the next report and there is no need to re-submit..

Thanks!

Ricardo Maestas

Hey Ricardo. How are things. Sound very busy, but that is a good thing as days go by faster that way. Dan is on vacation this week. Did you have any questions regarding the last map package or the first semi-annual groundwater level monitoring report? Have a great day and week.
