

ENTERED

Dear Trais Kliphuis:

I am very concerned about shielded containers. They would expand the space available at WIPP for remote-handled waste that is dangerous to transport, store, and dispose. Despite what the Department of Energy says, shielded containers could not be handled like contact-handled waste because damaged or leaking containers could be too radioactive to over-pack.

The shielded containers request once again is not a proper class 2 permit modification. I request a public hearing and that shielded containers be a class 3 modification so that there would be more extensive public comment and an opportunity for a hearing.

Thank you for listening to the public and our concern for our safety of our families and the land that supports us.

Sincerely,

Alyson Steinman
