Subject: Shipment of Containers from Waste Stream LA-MIN03-NC.001, Lot 482

Dear Mr. Kieling:

In accordance with the Stipulated Final Order, No. HWB 09-31 (CO) (LANL), prior to shipment of remediated containers from Waste Stream LA-MIN03-NC.001, respondents shall submit to New Mexico Environment Department (NMED) the following information for each container:

- A. A list of remediated containers being shipped;
- B. Evidence that each container has been remediated in accordance with approved Los Alamos National Laboratory (LANL) procedures; and,
- C. Evidence that Nonconformance Reports (NCRs) written for prohibited liquid have been dispositioned appropriately by the Central Characterization Project.

Enclosed is a digital video disk (DVD) containing the required documents for nine containers from Waste Stream LA-MIN03-NC.001. Each container listed, on Page 3 of this letter, has its Real-Time Radiography (RTR) Batch Data Report (BDR), NCR disposition information, and Prohibited Item Disposition (PID) form. The PID for some containers shows the parent containers and the daughter containers. These daughter containers passed RTR and do not have a NCR. The PID does identify that the container has been remediated for liquids.

We certify under penalty of law that this document and all attachments were prepared under our direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on our inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of our knowledge and belief, true, accurate, and complete. We are aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.
