Subject: WIPP

Again the people come after the profits! High times on Wall Street and hard times on Main Street. Now DOE doesn't even bother to try to protect the planet. Who needs testing to see if material is radioactive? How pathetic you people are!!!!!!!!!!!!!!

Subject: Sampling for WIPP

To Whom it May Concern

I am very concerned that eliminating sampling of waste bound for WIPP would reduce health and safety protections because such analysis is still needed, including for the many waste streams that have not yet been sampled. NMED should deny the request. Any future requests to reduce or eliminate sampling should only be made after the kind of systematic approach recommended by the National Academy of Sciences is carried out and made public and after representative sampling is done for waste streams that have not yet been shipped to WIPP.

Thank you for your attention.

James C. Faris, Ph.D.
