Trais,

This looks good.

John

Subject: FW: revised language

Instead of taking out the word "new" the Permittees are proposing the following language:

2.3.1.3. Waste Sampling and Analysis Methods

If, at any time prior to shipment of a new waste stream or at the time of review of a revised waste stream profile form, the Secretary or Permittees identify a discrepancy regarding the assignment of hazardous waste numbers not authorized in Permit Table 2.3.4, the Permittees shall require the generator/storage site to perform additional evaluation/characterization of the waste stream that may include chemical sampling and analysis of the waste.

If the Secretary or Permittees determine that additional characterization is necessary using chemical sampling and analysis, the Permittees shall direct the generator/storage site to provide the Permittees with the following documentation:

- a) Sampling and analysis plan
- b) EPA SW-846 test method(s), or functionally equivalent test method(s), to be used
- c) Identification of the laboratory(ies) that will be performing the test(s)

Upon request by the Secretary, the Permittees shall provide such documentation within 30 days after receipt from the generator.

Upon the Permittees written approval of the sampling and analysis plan, the generator/storage shall implement the sampling and analysis plan and modify the WSPF as appropriate. The Permittees shall provide copies of the approved plan and the results of all analyses to the NMED per Permit Attachment C, Section C-5a.
