Subject: WIPP Class 3 Permit Modification Request

To Whom It Concerns:

I fully support WIPP's effort to modify their permit with regard to panel closure, repository configuration, and to their proposed volatile organic compound monitoring changes.

As parent of young children growing up in Carlsbad, NM, the health and safety of their environment is among my greatest concerns. I have attended public meetings regarding the permit modification, attended briefings given by the Mayor's Nuclear Taskforce, and read the proposed changes to the permit. I am not an expert in any of the scientific fields related to WIPP's operation, but I have full confidence that the processes are well-thought out and will be executed in accordance with all environmental and safety requirements.

I strongly encourage the New Mexico Environmental Department to approve the recommended permit changes. If you have any questions regarding my support please call me at 575-628-2702.

Sincerely,

Suzanna Langowski
