

**INTEROFFICE MEMORANDUM**

**TO:** Trais Kliphuis, WIPP Group Manager

**CC:** Ricardo Maestas, WIPP Environmental Specialist  
Coleman Smith, WIPP Environmental Specialist

**FROM:** Steve Holmes, Environmental Specialist

**DATE:** February 24, 2014

**SUBJECT:** Sampling Set Up and Starting Air Sampling at the WIPP Site

On Friday, I set up two stations, after some repair and replacement of sampling equipment. These two stations were LVAS 2, located approximately a half a mile northwest of the WIPP site on WIPP Road and LVAS 3, located about 250 yards east of the WIPP site fence. I also started the sampling as soon as repairs were conducted.

On Saturday, I set up a third station, after an abundance of repairs and replacement of sampling equipment. This station is LVAS 1 located a few yards northeast of the Waste Shaft on the WIPP site. I started this sampling event very soon after the sampling equipment was set up and calibrated.
