**Subject:** Surface water and sediemnt samples

FYI-

Ricardo and I were discussing our sampling this week. We don't have a map yet, but I have requested GPS points for us to bring into our GIS.

These are the surface water/sediment sampling sites from the ASER report. These sites were sampled last week (March 12-14) by NMED/DOE OB. Sediment was collected at all sites except Red Tank. Water was only collected at the sites along the Pecos and at Hill and Tut.
