Rick,

Ricardo and I will have the mobile solar unit air sampler keys with us for the soil/veg sampling. I can meet up Wednesday or Friday after we finish sampling. Since I will be here until Saturday, I could also meet you out at the sampler Saturday morning before I return home to Albuquerque.

I also will be back in Carlsbad next week to do our ambient air and gamma radiation. So we can meet up next week if that is more convenient for you.

Regards,  
Susan

Rick,

I will send you the specs. We worked with Hi-Q to design and fabricate these units (we have two). I have ideas to improve the design for the next one we make that I'd be willing to discuss with you. I am in meetings all day today but we can chat tomorrow. Susan is headed down there today, if you hook up with her she can open it up and show it to you.

Cheers,  
TS

Tom – can you provide me information on the solar system you have? I am looking into getting a mobile unit like you to operate where needed.

Thanks,

Rick Salness, P.G.
