24 March 2014

Hello Trais,

I have reviewed all the information on the Draft Hazardous Waste Permit, and the attachments, for the Waste Isolation Pilot Plant near Carlsbad, NM, and I agree with all the papers and the applications presented and I see no problems.

The Waste Isolation Pilot Plant is truly the best place to store any type of radioactive waste materials in the underground salt chambers. Yes, there are going to be leakage problems, but I do not see any persons being harmed

I am a retired design engineer and I have seen the Waste Isolation Pilot Plant near Carlsbad and have been underground at that facility.

I do not have any questions at this time.

Michael J. Sepich
