Subject: FW: Questions

John and Trais,

Don Hancock sent Jim this list of questions. We should get answers to these in advance of meeting with him.

Thanks,

Ryan Flynn
Secretary
New Mexico Environment Department

Subject: Questions

Among the initial questions that would be helpful to have answered:

1. What NMED staff, including HWB, OB, and others, are involved in responding to the WIPP incidents?
2. What written reports has NMED received from DOE/WIPP about the fire and radiation leak incidents and when will those reports be publicly available?
3. When will NMED have results from its ongoing sampling, taken since 11:30 pm on Friday, February 14?
4. Is NMED taking soil samples in the vicinity of the WIPP exhaust shaft and around its air sampling stations (including between the stations and the exhaust shaft and beyond the station to "bracket" any amounts found)?
5. What additional sampling is NMED doing as a result of the radiation leak?

Thanks very much.
