Spring Equinox

Travis Kliphuis, WIPP Project Manager

Dear Sir:

This is a request for a public hearing on the Modification of the Draft Permit for WIPP. We are appalled that you might be considering allowing more radioactive waste in that facility. The recent accident last month on Valentines' Day should be a warning that there is already too much contamination to deal with there. We are praying for the health of those workers who have been exposed to toxic levels of radiation. Please refrain from adding insult to injury by approving the Modification.

Sincerely,

Al & Julie Sutherland
