Subject: FW: Entry Today

Since they are saying there are a limited number of lines, I will call in and send emails to the group as/if anything of interest happens. They are estimating that the expedition will take 4-5 hours and will start around 10:00 AM.

Subject: Entry Today

The next entry to the underground will be starting around 10:00. A question was raised regarding the radiological turn-back limits. For personnel using BG-4 Self-contained closed circuit breathing apparatus the limit is 5,000 DAC-hr. For personnel using PAPRs it is 500 DAC-hr. There is no contamination limit in place for today's entry. Areas will be marked appropriately when (if) contamination is found.

There will be an opportunity to call-in but there is a limited number of lines. The call-in number will be provided directly to Trais, Nick and Tom P when it becomes available. A recap of the entry will be provided at the end of the day. We will also update the status of the entry at our 1300 call this PM.

I also posted an updated work plan for today on the Portal.

Thanks

Oba
