Subject: Entry Status

During the entry today, the teams were able to rule out that there was any contamination coming from Panel 6 and made it into Panel 7.....but did not get to the waste face. At room 2 in Panel 7, the PAPR batteries were low and they opted to return to the surface. Tomorrow, the SS and AIS will be inspected and all of the data collected will be reviewed. Decisions regarding the next entry will be made and I will give you the latest information at our 1:00 call.

Have a great night.

Thanks

Oba
