Subject: Video Posted

Just a heads-up, I posted a short video of the entry on the ICLN webpage.

Thanks

Oba

Subject: WIPP Information - For Call Today

Attached are the action item list, filter data, report on LA-MinO2 waste activities and Station A/B data.

Below is a summary of activities: (Please note, activities and dates are subject to change. Please verify the most current dates of any information provided).

- Underground remains in Filtration Mode utilizing Fan 860C.
- Cleaning of the soot from the fire event in the Waste Handling Tower is continuing; Cleaning of the mezzanine is complete. A meeting is being held on 5/12 to discuss the cleaning of the electrical equipment.

- The date for the filter change-out will be changed from 5/17 to allow time for further investigation into the cause of the event, as long as the filters continue to perform with no problems.
- Weekly MSHA inspections of the AIS & SS were completed on 5/8. (No Change)
- Activity 6 - Reestablishment of Radiation Protection Program in U/G: A series of entries will be made into the U/G to modify postings, maintain CAMs and establish "clean zones". A CAM is operating at the base of the SS which can be monitored from the surface. On 5/8, the area between the SS and AIS down to S-90 was surveyed in preparation of making the area a RBA. A CAM was also set-up for remote monitoring. The survey results were reviewed and the area was reposted on 5/10. NWP personnel will re-enter the mine today to bring additional equipment from the 5/10 entry back to the surface.
- Activity 7 - Continued Survey of Panel 7 Waste: Obtain additional video and pictures to acquire an aerial view of the waste containers in the area of interest, conduct thermal imaging and collect wipes from the area to help determine the cause of the event. Activity 7 was completed on 5/10. Three passes over the waste columns were made with the video camera. The video is being evaluated but nothing conclusive was immediately identifiable. Pictures and video is being posted on the ICLN Portal.
- Activity 8: Meetings are being held to determine the scope of the next activity. Tentative plans are to get equipment which will allow video to be taken further back in the stacks of waste in Panel 7 and also closer to the waste. Sampling will also be discussed but may not be planned for the next entry. If possible, Activity 8 may be conducted on 5/14.
- 39 shipments have been made to WCS. Waste shipping is on hold due to the concerns associated with waste potentially containing nitrate salts. Additional, waste shipping restrictions were placed on LANL waste due to concerns over an acceptable knowledge package. (No Change)

NOTE CALL-IN NUMBER: 1 888 413 3490, Code 7175394

Thank you

Oba
