Subject: Shaft inspection today...no entry to waste face

Just an update, the entry to the waste face for more video will be delayed one day. Today, the shaft inspections will be completed. The PAPRs were not removed from the mine until late yesterday and the batteries require a 24 hour charge. We would rather start the entry early in the day...so the decision was to delay one day. That also may give NWP more time to identify approaches for getting video further back in the area of interest.

Thanks

Oba
