**Subject:** Re: LANL- requested information

Pursuant to your request, attached is the *LANL Summary Providing Input for WIPP Meeting on 6/30* – which was provided for the 7/1 call.

As these notes are separate from the LANL/NMED call under the Administrative Order, we are sending this document to you in separate email.

Thank you

Tori

**WIPP Event Investigation  
LANL Summary Providing Input for WIPP Meeting on 6/30**

*LANL Scientific and Operational Activities*

- Completed hourly visual inspections and daily thermography inspections of nitrate salt bearing waste containers since previously reported on 6/26. No issues or anomalies were identified in any of the inspections.
- Daily headspace gas sampling through the filter on the SWB containing drum 68685 was taken. On Monday (6/30) the CO<sub>2</sub> measured at 18,787 ppm, and H<sub>2</sub> measured at 81 ppm.
- Daily headspace gas sampling is now being taken on seven additional SWBs to better be able to compare and evaluate results against the SWB containing drum 68685.
- One of four empty nitrate salt waste parent containers was sampled on 6/26. (S864694) Samples were delivered to CMR and TA-48 on Monday, 6/30.
- Planning and preparing of recommendations for waste remediation and treatment is continuing.
- Chemistry investigations and lab tests are continuing.

*Coordination and Communications*

- LANL is conducting a All Hands meeting tomorrow to provide an update to LANL employees. (Badge Holders only)
