Subject: RE: WIPP Information - For Call Today

Below is a summary of activities for today's call. (Please note that activities and dates are subject to change. Please verify the most current dates of any information provided.)

- The Air Intake Shaft was inspected yesterday, 10/6. The Salt Shaft inspection is planned to be completed today.

- Zone roll back in the underground continues (see map). More than 50% of the mine has been characterized and declared a Radiological Buffer Area or a Controlled Area, requiring no PPE for entry.

- Work is continuing to progress to initiate roof bolting. Required Work Control Documents have been developed and preventive maintenance on required support equipment, forklift, lube truck, and scissor lift have been initiated or completed.

- A video log of the Waste Hoist shaft was completed yesterday. No issues were identified in initial review. A detailed review of the video is taking place today. PMs on the hoist are expected to take two weeks and are expected to start this week.

- The REACH equipment is located at the WIPP facility awaiting relocation to the underground. It will be stored at the Facility until the Waste Hoist is operational for transport to the underground and reassembled. Entry into Panel 7 Room 7 took place last week to support REACH activities. This entry was completed to verify dimensions in the waste face area and identify any rock bolts or other obstacles.
to boom emplacement. No ground control or other issues were identified. Underground emplacement of the system is expected by the end of October with photography planned to start in early November.

- The HEPA skid and effluent fan units are progressing on schedule.

- The next Town Hall Meeting is scheduled for 10/16.

NOTE: CALL-IN NUMBER, 1-888-413-3490, CODE 7175394

If you have any questions for this week’s call please contact me or George Basabilvazo,

Russell Patterson
Compliance Certification Manager
DOE/CBFO
Russ.patterson@cbfo.doe.gov
575-234-7457 or 575-706-0027
DEFINITIONS

CA = > 20 dpm/100cm² BETA REMOVABLE
>
HCA = > 2,000 dpm/100cm² ALPHA REMOVABLE
> 20,000 dpm/100cm² BETA REMOVABLE.

SURVEY PROCESS FOR ROLLBACK INVOLVES CONTINUOUS DIRECT SCAN OF THE DRIFT AND SMEARS EVERY 2FT ON THE RIBS, GROUND, AND EQUIPMENT.

PANEL 7 - 20,000-60,000 dpm/100cm²
PANEL 7, ROOM 7 - > 1 million dpm/cm² ALPHA ON THE EXPOSED WASTE
S-2530 TO S-3080 - SPOTS RANGING FROM 200 TO 500 dpm/100cm² ALPHA

NOTES
1. DRIFT WIDTH NOT TO SCALE, ENLARGED 2X FOR CLARITY.
2. EXISTING EXCAVATION ReflectS STATUS AS OF 1/20/14.
