Subject: Small Grass Fire Near WIPP

Good morning all,

George B. from CBFO notified yesterday evening and provided a follow-up this morning on a small grass fire about 2 miles north of the WIPP Facility, along the North Access Road, "not apparently" in the Land Withdrawal Act area. The small grass fire was extinguished yesterday. Cause may have been from a spark from a wheel on an oil field truck.

I'll pass along any further information that may come in.
