Subject: RE: WIPP Information - For Call Today

Happy February 10, 2015

The call in number is: 1-866-757-5307

Participant code: 5794706

Below is a summary of activities for today's call. (Please note that activities and dates are subject to change. Please verify the most current dates of any information provided.)

- * Radiological contamination assessments of the underground are ongoing E-140, W-30, and W-170 between S-2200 and S-2900 with Panel 8 being rolled back to a Controlled Area.
- * Bolting activities have transitioned to the E-140, W-170 drift, and Panel 8. In addition, bolting activities have commenced in contaminated areas, starting at the S-1950/E-140 drift, progressing to the S-2610 drift.
- * The Accident Investigation Board has completed its analysis of all of the images obtained through Project Reach, and we anticipate release of Panel 7 this week.
 - The Reach equipment is being dismantled and being prepped for safe storage underground.

- EPA R6 asked for a copy, when available, of WIPPs plan for closing off Panel 7 Room 7,
- NMED will send Nick Stone the Isolation Plan that was submitted by WIPP on Sept. 30. Closure of Panel 6 and Room 7, Panel 7 is described.
- EPA R6 is concerned that if there has not been sufficient sampling of breached drum that closing off Room 7 permanently would deny the possibility to retrieve or do further sampling.
- No physical samples were taken during this last phase of Project Reach, only video and photo.
- EPA asked about the sampling of breached drum that occurred last summer. CBFO added the question to the action items to provide latest info.

* In preparation for interim closure of Panel 6, the maintenance and restoration of the required contaminated equipment has been safely completed and returned to service. Decontamination activities involving washing the ribs with water has begun in the E-140/S-3080 intersection and the W-30 drift between S-2180 and S-2550. These decontaminated areas and equipment are only for restricted use and will still be controlled for radiological contamination purposes.

- NMED requested a list of all the contaminated and decontaminated equipment in the underground.

* Ongoing visual checks are being performed to evaluate the extent of soot accumulation on electrical equipment and to clean, if necessary. Power has been restored to the EXO.

* The next Town Hall Meeting is scheduled for March 5th.

If you have any questions for this week's call please contact me or George Basabilvazo,

WIPP RECOVERY 1:00 WEEKLY MEETING ACTION LIST

Revised 02/04/2015

	A	B	C	D	E	F
1	Date Identified	Requestor	Action	Responsible Person	Due Date	Status
90	07/15/14	Kathy Economy	If LANL cannot initiate a reaction in a MIN02 waste stream, what will be done?	LANL		LANL testing continues.
113	10/14/14	Steve Holmes	Requested the status of any entries to the Occurrence Reporting and Processing System (ORPS) since the February fire.	Basabilvazo		
120	11/04/14	Nick Stone	Requested a copy of the detailed WIPP Recovery Plan.			
121	11/25/14	Coleman Smith	Requested a copy of the "Site Implementation of the Recovery Plan" after it receives DOE/HQ approval. Cole wasn't sure of the exact title of the document.			
135	01/20/15	Kathy Economy	Will the breached drum in Panel 7, Room 7 be sampled?			<p>Closed. There are no plans or direction from the AIB to sample the breached drum.</p> <p>Closed. The TAT has provided no analytical results. It has been noted that there are no indications that components in the sample results would change the current controls in place for Panel 7 Room 7.</p>
137	01/27/15	Nick Stone	Do the analytical results from the samples taken of the breached drum indicate reaction products?	Jones
