Ricardo,

Thanks for the info.

I'm fine with them forgoing the 5-day written notification for the 15-day report. I'd rather them submit one comprehensive notification than spend time generating two.

Thanks,

Katie

**Subject:** WIPP 24hr Oral Report 03-06-2015

Katie,

George B. from CBFO and Rick Chavez from NWP called my office today at 3:30pm. They mentioned that they had also left a message on your cell phone. They called me to orally report the following information per WIPP Permit Section 1.7.13.1. Oral Report:

WIPP will be provisionally applying the HWN D001 (ignitability) to the recently discovered four containers of suspect nitrate salt bearing waste that are located at WIPP.

Those four containers are identified as:

- 87822 located in Panel 5, Room 1
- 87824 located in Panel 6, Room 4
- 91768 located in Panel 6, Room 2
- 91769 located in Panel 6, Room 2

George B. was also inquiring if the Permittees could submit a 15 day written report as opposed to a 5 day written report per WIPP Permit Section 1.7.13.3.

He stated the extra time would allow further communication between Los Alamos National Lab and WIPP to continue to verify this information.

George B. also mentioned that WIPP Senior Management did contact NMED Senior Management on March 5, 2015 to provide an operational update to NMED and these four containers were mentioned.
