Subject: WIPP - 24-Hour Oral Notification - 3/13/15

All,

George B. from CBFO and Rick Chavez from NWP called my office today at 2:00 PM.
The called me to Orally Report the following information per WIPP Permit Section 1.7.13.1. Oral Report:

WIPP will be provisionally applying the HWN D001 (ignitability) to the three recently discovered containers of nitrate salt bearing waste that are located at WIPP.

Those three containers are identified as:

- 88327 located in Panel 5, Room 1
- 89308 located in Panel 6, Room 6
- 89309 located in Panel 6, Room 6

George B. was also inquiring if the Permittees could submit a 15 day written report as opposed to a 5 day written report per WIPP Permit Section 1.7.13.3.

He stated the extra time would allow further communication between LANL and WIPP to continue to verify this information. I approved this request. Therefore, the 15-day written report is due on March 28, 2015. Because March 28th is a Saturday, the Report is due on Monday, March 30, 2015.

They also stated that they may try to include this information in the 15-day written report currently due on March 23rd.

They also asked whether or not the Secretary required notification from CBFO senior management and I told them they could forgo that notification and I would brief the Secretary.

Please let me know if you have any questions.

Thanks,
Katie

Kathryn Roberts
