Good Afternoon All,

Attached is the summary of the March 26, 2015 conference call on the implementation status of the WIPP Nitrate Salt Bearing Waste Container Isolation Plan.

The WIPP participants on yesterday’s conference call are listed below:

Anthony Stone, CBFO
Rick Chavez, NWP
John Haschets, NWP
Dave Sjomeling, NWP
Bob Kehrman, NWP
Charlotte Sisk-Scott, NWP

Anthony R. Stone
DOE/CBFO-EPD
RCRA Program Manager
575-234-7475
Cell 575-706-5193

Panel 6 Initial Closure

Access to Panel 6

a. Rollback

- Contamination Assessment—100% of the underground has been characterized for radiological contamination. Based upon this characterization, the north end of the underground starting at S-1950 with the exception of the E-300 is posted as a controlled area. The E-300 drift north of S-1950, the S-2180 drift, and Panel 7 are posted as high contaminated areas and airborne radioactive areas. In addition, all areas south of S-1950 are posted as contamination areas and airborne radioactive areas.

- Fixing/Decontamination Activities—Maintenance restoration of equipment in Panel 7 that has been decontaminated is currently underway. Decontamination of equipment in Panel 7, Room 7 is ongoing. Both ribs and the floor have been sprayed with water in the E-140 drift from S-1950 to S-2520 and in the S-2520 drift from E-140 to W-170.

b. Ground Control Status

- Bolting—Bolting has been completed in the S-2750 drift between E-140 and Panel 6 and is continuing in the W-30 towards the S-3080 drift (Panel 6 access drift).

c. Habitability

- Communication Systems—Operability tests have been performed for the underground mine phones and the public address system located in the access drifts to Panel 6.

- Self-Contained Self-Rescuers—Caches have been restocked in the drifts to Panel 6. Habitability activities have been completed in the underground in drifts E-140, W-30, and W-170 to provide access to Panel 6 to support Panel 6 initial closure activities.

- Eye Wash/First Aid Stations—Inspections in the accessible areas have been completed.
d. Drills, Training, Mockups

- The Underground Response Drill was performed on March 11, 2015.

**Equipment/Ventilation/Materials**

a. Electrical

- Restoration of electrical switch stations in the underground north of S-1950 drift has been completed.

b. Ventilation

- Air Flow—The underground ventilation system is currently operating in filtration mode using one 860 fan that supplies a nominal flow rate of 60,000 standard cubic feet per minute to the underground.

- Preparations are underway to replace the pre-HEPA ventilation system filters. No underground activities will be conducted during this process.

c. Stage Needed Materials in Underground

- A 10 HP portable fan that will be used to provide localized ventilation for Panel 6 initial closure activities has been installed at W-170/S-2750. A fan is planned to be installed at the W-170/S-3080.

- Preparations are being made to install a bulkhead in the S-2750 side of Panel 6.

- Fabrication of the first set of Panel 7, Room 7 bulkheads has been completed.

**Document Preparation**

a. Work Planning

- Work planning documents have been finalized for work activities required for initial closure of Panel 6.
WIPP Nitrate Salt Bearing Waste Container Isolation Plan
Implementation Update
March 26, 2015

- Work planning documents for installation of Panel 7, Room 7 bulkheads have been completed.

b. Safety Basis Documents

- The safety basis document that supports safety basis authorization for Panel 6 initial closure and Panel 7, Room 7 closure has been approved.

Summary - Information Requests/Status

NMED requested a finalized copy of the Waste Isolation Pilot Plant Decontamination Plan.
