Santa Fe, NM 84505

Dear Mr. Maestas,

Regarding the Class 2 Permit Modification Requests + Ventilation Reduction Plan at WIPP, I offer public comment.

To allow workers less than 35,000 standard cub. ft per minute ventilation has been judged insufficient already. No such activity can be allowed.

And the E-300 drift cannot be used as a secondary evacuation route, as respiratory protection equipment is used in more than 2,000 ft of that drift. Problems caused by the contamination underground must be reflected in any new plan.

Thank you for your attention and I will look for your response.

Sincerely,

Carol W Benson CAROLBENS@aGmail.com
