WHY: On January 31, 2018, the Permittees submitted a Class 2 Permit Modification Request to the New Mexico Environment Department (NMED). The Permit Modification Request proposes to:

- Clarify that Final TRU Mixed Waste Volumes reported by the Permittees are based on outermost disposal container volumes
- Explain that LWA TRU Waste Volume of Record is tracked and reported separately by the DOE relative to the WIPP LWA total TRU waste capacity limit of 6.2 million cubic feet
- Revise the final remote-handled TRU mixed waste volume reported for Panel 6 to reflect the outermost container volume for shielded containers
- Revise the Part A Permit Application to ensure consistency between the process design capacity and the maximum capacities of the Hazardous Waste Disposal Units allowed by the Permit in Part 4, Table 4.1.1
- Revise the maximum waste inventory description in the Closure Plan to ensure consistency with Permit Part 4, Table 4.1.1
- Make editorial changes throughout the Permit to ensure consistency of text relative to the changes described above
