Hazardous Waste Bureau  
New Mexico Environment Department  
2905 Rodeo Park Drive East, Building 1  
Santa Fe, New Mexico 87505

Subject: Evidence of Mailing to the Waste Isolation Pilot Plant Facility Mailing List and Publications of Notification for two Class 2 Permit Modification Requests, Permit Number NM4890139088-TSDF

Dear Mr. Kieling:

The purpose of this letter is to provide the New Mexico Environment Department with the information identified in 20.4.1.900 NMAC (incorporating 40 CFR 270.42(c)(2)), regarding the following permit modification requests. This evidence is included in Enclosure 1.

- **Class 2 Permit Modification Request (PMR) entitled *Training Program Revision, Changes Due to Construction and Operation of a New Filter Building*, submitted to the NMED on November 29, 2017.**
  - December 1, 2017, invoice from Mail Service Center, Carlsbad, New Mexico for duplication and mailing of the PMR to the facility mailing list
  - December 3, 2017, Public Notice from the Albuquerque Journal
  - December 3, 2017, Public Notice from the Carlsbad Current-Argus
  - December 3, 2017, Public Notice from the Santa Fe New Mexican

- **Class 2 PMR entitled *Clarification of TRU Mixed Waste Disposal Volume Reporting*, submitted to the NMED on January 31, 2018.**
  - February 2, 2018, invoice from Mail Service Center, Carlsbad, New Mexico for duplication and mailing of the PMR to the facility mailing list
  - February 2, 2018, Public Notice from the Albuquerque Journal
  - February 2, 2018, Public Notice from the Carlsbad Current-Argus
  - February 2, 2018, Public Notice from the Santa Fe New Mexican
Mr. Kieling

If you have questions regarding this submittal, please contact Mr. Michael R. Brown at (575) 234-7476.

Sincerely,

Todd Shrader, Manager
Carlsbad Field Office

Bruce C. Covert, Project Manager

Prisoner executions up slightly in 2017

Michael Grady
Associated Press

HOUSTON — A court on Monday granted the scheduled Dec. 18 execution for Texas inmate Clinton Young, whose friend office said it won’t request any execution.

Attention was on the second scheduled execution this year in the state that impose the death penalty, according to the Texas Criminal Code in 2017.

Young’s execution was the 20th scheduled in the state this year, following the execution of Texas inmate Juan Castilleja, who was found guilty of capital murder.

Castilleja was the last execution scheduled for 2017 in the state to impose the death penalty, according to the Texas Criminal Code in 2017.

Texas put to death seven prisoners this year, matching the state total from 2016. They were the 15 inmates who were put to death this year — up from 20 last year. In all, 2007 executions were carried out four executions, followed by Alabama and Florida with three each, and Ohio and Virginia with two each. George, which topped the nation in 2006, saw its last inmate put to death last year. Another year in 2017.

Among the more than three dozen counties considered in the U.S. who were court-approved to conduct executions, Oklahoma put to death an inmate who was sentenced to death in 1878, and the state’s attorney general’s office wants to keep any execution dates until within 30 days after certain dates have been released.

A significant impact in Texas was approved of life without parole as a sentencing option in capital murder cases starting in September 2015. Before that, just 1 of 12 executions had been allowed with a death sentence and a prison sentence that often meant life without parole. That’s down from 34 lives that can’t be prosecuted.

At least eight inmates — six from Texas and one each from Mississippi, Alabama and Arizona — are set to die in the first quarter of 2018. The first, scheduled for Jan. 11 in Texas, is Anthony Allen Storte, who confessed to killing multiple people and is known in the Housman area as the "Tremont Killer."

Hi, Miller received his training in hearing aids in Texas, California and Minnesota. He has been serving the hearing needs of New Mexico for 30 years. During that time, he has successfully fit over 10,000 hearing aids. He has recently received advance training in the latest technology by Miracle-Ear. Call today to schedule a time to see him.

Miracle-Ear Advantage:

100% Satisfaction Guarantee* - 3-Year Limited Warranty**

WASHINGTON — President Donald Trump, speaking at the White House before a trip to New York City that he would consider setting the corporate tax rate at 23 percent, compared to a 35 percent rate that he has pushed for with House and Senate Republicans during the bill’s passage, said he would go to Congress for a final bill that would lower the tax rate to 20 percent.

Trump said she would provide most of the changes to the tax code in three decades and help deliver the first major legislative victory of his presidency.

President Trump’s suggestions of a higher corporate tax rate than what has been included in legislation approved by the House and Senate after the president and his administration maintained a hard line on corporate tax rates.

To President Mike Pence said in a speech in California that the Treasury Department should not cut the corporate tax rate from one of the highest in the world down to a “very low” rate.

Giving care and encouragement to dropouts

We are all aware of the high school dropout rate of about 30% in the United States. These students are not regularly attending school due to various reasons such as personal, economic, or social issues. The impact of this dropout rate is significant, not only for the students themselves but also for the society as a whole.

Giving care and encouragement to these students is crucial. Many of them have dropped out due to previous failures or lack of encouragement. By providing them with care and encouragement, we can help them overcome their challenges and continue their education. It is important to remember that every student has the potential to succeed, and with proper support, they can achieve their goals.

Encouragement can come in various forms, such as counseling, mentorship, or even just a friendly face. It is essential to create an environment where these students feel valued and supported. By doing so, we can help them regain their confidence and motivation to continue their education.

In conclusion, the dropout rate is a significant issue that requires our attention. By giving care and encouragement to these students, we can help them overcome their challenges and continue their education. Let us make a difference in the lives of these students and provide them with the support they need to succeed.

Through hardships, resilience

Continued From Page 9

I am still proud that my child graduated and is now attending college. In December of last year, I received a call from a friend who told me about an educational program for students who had dropped out of high school. I immediately called my child and told him about the program and he expressed interest in attending.

The program offered courses in various subjects, and my child is currently attending classes in mathematics and science. He is doing well in his studies and is passionate about learning. I am proud of him for taking this step towards completing his education.

In conclusion, dropping out of high school is not the end of the world. It is never too late to go back to school and pursue your dreams. With hard work and determination, you can achieve your goals and make a difference in your life.

Public Information Meetings
Revised Version of the Hazardous Waste Facility Permit for the Waste Isolation Pilot Project

U.S. Department of Energy (DOE) manages and operates the Waste Isolation Pilot Project (WIPP) in New Mexico. WIPP is a geologic repository for the disposal of high-level radioactive waste from the U.S. Department of Energy's defense programs.

On November 20, 2017, the Pendleton Community Foundation in conjunction with the Waste Isolation Pilot Project (WIPP) in New Mexico, New Mexico Institute of Mining and Technology, U.S. Department of Energy (DOE), and the New Mexico Environment Department (NMECD) presented a public forum entitled, "Update on the Revised Hazardous Waste Facility Permit for the Waste Isolation Pilot Project (WIPP)."

The purpose of the forum was to provide an update on the pending permit application and to solicit input from the public for the revised earning facility permit for the WIPP.

The forum was held at the University of New Mexico in Albuquerque, New Mexico, and was attended by over 100 people. The meeting included presentations by experts in the field of environmental protection and radioactive waste disposal.

The forum was well attended and provided a valuable opportunity for the public to learn about the proposed changes to the permit and to provide input. The forum was also an important step towards ensuring that the WIPP is operating in an environmentally safe and responsible manner.

For more information, please visit the Pendleton Community Foundation website at www.pendletonfoundation.org or contact them at (505) 267-3300.

Total $873.61
2 Patriots delivered huge plays in previous Super Bowls

Josh Dubow

BLOOMINGTON, Minn. — James Harrison and Malcolm Butler can probably trade stories on the subject of the two most memorable pass plays they’ve been a part of in the Super Bowl.

The two New England Patriots veterans are among the handful of the league’s greatest players who have been on the receiving end of the game-winning play in a Super Bowl.

Butler’s interception at the goal line that turned what looked like a sure title into a heart-stopping loss for the Los Angeles Rams in Super Bowl LIII.

Harrison’s strip-sack in the fourth quarter to earn the AFC’s Super Bowl MVP, and send the Pittsburgh Steelers on to Super Bowl XL.

Butler, who played in four Super Bowls for Tom Brady and the Patriots, has his favorite.

“It’s the one we are all thinking about,” said Butler, a linebacker who played in Super Bowl XL, Super Bowl XLV, Super Bowl XLVI and Super Bowl LIII.

“I don’t think you can get any better than that,” he said, referring to the game-winning interception he made on the Rams’ final play in Super Bowl LIII.

“I knew the Rams would go to the fade route,” he said. “I mean, everybody knows they run that fade route. I just happened to be there and they happened to throw it right to me. It was a great play.”

Butler’s interception in the goal line that turned what looked like a sure title into a heart-stopping loss for the Los Angeles Rams in Super Bowl LIII.

Harrison’s strip-sack in the fourth quarter to earn the AFC’s Super Bowl MVP, and send the Pittsburgh Steelers on to Super Bowl XL.

Another short-term spending bill?
U.S. is silent as strongmen steamroll their opponents

By Debra M. Simonds

The New Mexican
CALIPEZ ... Where is a voice to weigh in on the role of Egypt's strongman in forming little "coalitions"?

Trump and strongmen in the Middle East are building "coalitions" with common interests. In Calipez, for example, President Donald Trump, who has led the anti-Islam "coalition," and other Western strongmen have formed "coalitions" among countries to "steamroll" opponents. This is a growing trend, especially in light of their strong support of the United States or their anti-Islamic rhetoric.

The U.S. is silent as strongmen steamroll their opponents.

The New Mexican

At a recent meeting with Secretary of the State of the Union, President Donald Trump discussed the importance of forming "coalitions" and "steamrolling" opponents. He emphasized the importance of building strong alliances with other countries to achieve common goals and objectives.

Trump stresses the importance of forming strong "coalitions" in the Middle East.

The New Mexican

"The situation in the Middle East is critical," President Trump said. "It is essential that we build strong alliances with other countries to achieve common goals and objectives. We must also be willing to use force to protect our interests and those of our allies."
