

### WATER, AIR AND LAND: A SACRED TRUST

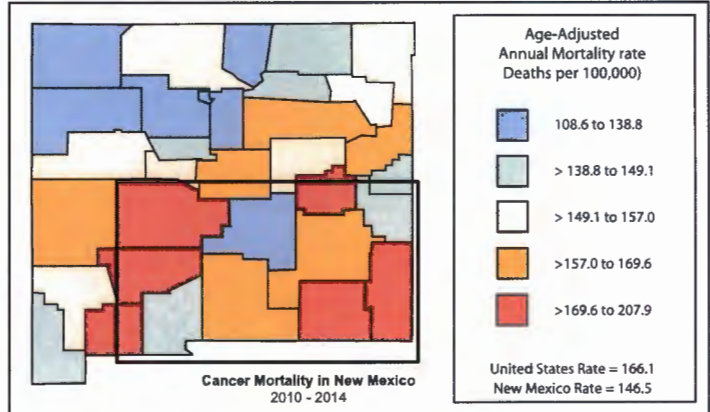

The uses of water, air and land are diverse in New Mexico and will change dramatically with climate change. For caretakers of this sacred trust, this map offers a bird's eye view of the health of our environment in southeastern New Mexico. It documents primarily the energy-related sources of pollution, though in New Mexico other polluting factors are also at work. This map does not cover *abatement sites, solid waste facilities and voluntary remediation sites*, among other things. Also, this map shows major water basins only.

Credits: We are grateful for initial project funding from the *Mercy Sisters - Northeast Community* and for additional project funds from the *New Mexico Community Foundation* in 2013. Maps created by *Deborah Reade, Deborah Reade Design*. Research by *Concerned Citizens for Nuclear Safety, Deborah Reade Design, Multicultural Alliance for a Safe Environment, Partnership for Earth Spirituality, and New Mexico Interfaith Power and Light*. Research and data interpretation by *Carlos Bustos, Resource Consultant and GIS Specialist*.
